

Legare Cost Loader

Aviation Industry Case Study International Airport

Industry: **Aviation & Facilities Management**

Background:

- Collabro worked in partnership with Milestone UK to implement Legare within this highly reputable client.
- Customer had hundreds of users with a requirement to bucket load cost profiles using financial periods in Primavera.

Challenges:

- Manual entry would be time consuming, error-prone and require access to the Primavera client.
- Project had many different contractors and procurement suppliers involved, which meant that a flexible licensing model was crucial.

Solution:

- Legare was chosen to let users upload profiles using a standard configuration.

Result:

- Allowed data uploads to be performed within month end period faster and more reliably.
- Client had identified no alternative means of carrying out this task within the designated time scale - Legare achieved this.
- Due to the flexible large scale licensing model, Legare is being utilized by over 100 users and contractors.
