

A photograph of a white helicopter with a green stripe on its side, landing on the deck of a ship. The ship's deck is covered with a green safety net. The ocean is visible in the background under a clear blue sky.

# TRAVEL MANAGEMENT INTEGRATION SOLUTION

## CASE STUDY

### Product Overview

The Vantage POB\* - travel management integration solution allows efficient, end-to-end travel management by businesses with complex, multi-mode personnel logistics operations. The system can be used by both individual travellers and the organisation's travel planning teams. It provides a seamless approach to managing travel requests, journey planning and management approval.

### Key Features

Key system features include:

- Real time data synchronisation between Vantage POB and the travel management system.
- Allows the traveller and travel administrator to manage and view the end-to-end journey including scheduled and charter flights, rotor flights, hotel and camp accommodation, buses/coaches and boats.
- Validation of site and rotor/charter flight capacity availability prior to scheduling travel, including, where appropriate, class of accommodation available.
- Validation of personnel certification and medical compliance prior to scheduling travel - this enables any certification issues to be dealt with in advance of departure date.
- Simple user interface that aids travel admin efficiency.
- Avoids duplication of data across the two systems and eliminates data discrepancies that can require significant time and effort to resolve.
- System also has the capability to manage freight movements.
- Supports the generation of bulk travel itineraries based on the forward rosters of core crew.

## CASE STUDY

### Benefits to User Businesses

The system delivers a range of important business benefits:

- Simplified travel administration, increasing efficiency and reducing operating cost.
- Streamlined travel request and approval, reducing non-value add workload and improving productivity.
- Opportunity for improved management overview of travel spend and capacity usage.
- Reduction in travel costs through ability to plan and book ahead for core crew travel. Costs are also reduced through the ability to coordinate multi-mode travel schedules.
- Enhanced data integrity reduces time and cost of database maintenance and ensures passengers information is always current.
- Retains all the benefits of Vantage POB in terms of emergency response and POB management.

### Benefits to the Traveller

- Single itinerary detailing entire trip
- One point of contact in the event of travel queries or in the event of change of travel plans.
- Online travel request system that provides a one-stop process for requesting trip booking and authorisation irrespective of trip complexity.
